Allowable Subject Matter

1. This office action is in response to the amendment after final filed on 07/01/05.
2. Claims 1-10, 21-29 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

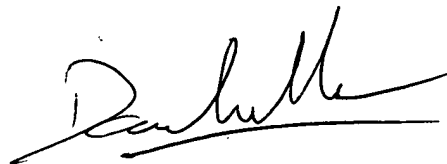

Applicant has amended the claims in accordance with the office action dated 04/01/05. Particularly, claims 11-20 were cancelled. Upon further consideration, claims 1-10, 21-29 are allowed, as indicated previously. Prior art of record, taking individually or collectively, fails to fairly teach a jitter control method and apparatus including "generate a transmit time error signal as a function of timing synchronization associated with a communications network clock and a transceiver master clock" and "stuffing control signal into said transmit signal as a function of said transmit time error signal and said filtered time error signal", as claimed, in independent claim 1 (claims 2-5 depend therefrom) and similar claimed subject matter in independent claims 6 and 21 (claims 7-10 and 22-29 depend therefrom). Thus, claims 1-10, 21-29 are found to be novel and unobvious over prior art of record.
